Mass Add Requests

Mass Update Requests

Mass Delete Requests

Different ideas on how to use the mass update groups module:

- **Add**-Entire grade levels course requests (Core and Electives)
- **Add**-Just electives request
- **Add**-Lunch Requests
- **Add**-Team Requests (most likely used in a Middle School setting)
- **Delete**- a course that school decided no longer to offer
- **Update requests based on a prior rule**. Example 8th grade Marching Band. Band would be selected as the course to add, then in the next rule, for any student that had Band, their Music 8 course would be dropped.
- **Update requests because school decided to no longer offer a course and all students will be moved to another course request**. Example school decided to no longer offer Digital Design. All students who formerly requested Digital Design should now have a request for Computer Applications.
