Different ideas on how to use the Public Course Request module:

Different groups of students
- All middle school and high school students.
- Just future 10-12 grade
- Incoming freshman only
- Students who are virtual

Different types of requests
- Just elective requests (office staff still enters core course requests)

Different ways of collection
- By classroom groups in a lab
- URL is available at home and students are responsible to do it at home.
  - Credentials can be mail merged to letter with steps or can be email mail merged

Verify or Approval ideas
- Office staff still enters all course requests, but students can log in to get view only to "verify" electronically
- Guardian access to view only and "verify" or to modify/approve.
